In October 2016, many games were allegedly hacked by a group calling themselves "The Bureau". The group claimed to be responsible for hacks on other popular websites such as YouTube, PSN, Microsoft's Xbox Live and Blizzard Entertainment's Battle.net. The group also claimed to have over 2,000,000 players' personal information.

Floating Balls! I have noticed that when you are at a group world and getting on people's chat heads they should be able to fly around like on normal. We need this because there are so many times where such a little bug would make these people mad if they were floating anywhere near them because they would not know what to say. Even though there are thousands of people in the group there should be more room for them to float. I think that there should be more than one chat head. I have seen people report this bug but it has not been fixed and I really want to see it fixed.

On May 24th 2019, ROBLOX announced another update for their Studio 2.1 version. This update, known as "Studio 2.1.1", was released to the public on May 31st 2019.[98] Like many other platforms, ROBLOX also has an adult chat system. This is usually used by roleplayers and other users who wish to talk about mature topics freely. However, players have abused this feature by advertising Roblox pornography websites or trolling innocent users.[99] Some users have also used the system to claim that their username is "Not suitable for children" or use inappropriate usernames in order to get attention from others.[100] It is unknown whether ROBLOX will ever remove this feature from their platform.

On July 31st 2019, ROBLOX announced they would no longer be supporting this feature, and will be removing all games that are now using this physics system from the ROBLOX Catalog. This will affect nearly every game and millions of gameplay hours into future. The reason why they are discontinuing the feature is because most games with custom physics settings were [[Rage Quitters's favorite targets, and almost all of them are either unplayable or broken due to Roblox's buggy physics engine.

ROBLOX is among the few websites that provide analytics data on their members. This data is collected from the number of visitors, members and games played. Many large groups have been created to publicize the statistics of ROBLOX. One such group is "We Hate Fake Players", which regularly posts ROBLOX statistics on its profile.[43]
