The product has received various negative comments on their forums due to the fact that they had broken features, it is unclear why they released the product before fixing all the bugs.

On March 18th, 2019, ROBLOX announced that they were working on a system that would allow them to detect bot accounts and confiscate accounts from them.[31]On April 25th, 2019, ROBLOX announced "Secure Trading" again as they would require players to use their respective Facebook page accounts for trading purposes. As of June 15th, 2019, ROBLOX will still allow customers from around the world to trade with other users without requiring Facebook. [32]

The purpose of this update was to improve the player's experience of ROBLOX's website and also earn more revenue for ROBLOX by making users spend more time on their website (thus charging users extra money). The biggest change in this update was the live chat feature, which allows players to communicate with other players while playing and has recently been updated to be implemented directly into every game on the site.

The only way that these items have any value is if developers add more to the game and make them items that are actually worth something within your virtual world. If that happens then these fake items will be worth even more than what you paid for them originally because the developers added real content to the game.

They're clearly taking steps in this direction by creating special perks, abilities, etcetera for those who have purchased robux from them. They're also creating clothing items which are being sold for outrageous prices with the sole purpose of being able to differentiate those who pay from those who don't in their game. This is wrong. It's unethical and it should not be tolerated.
