Roblox has also been criticized for not having realistic physics. Roblox used to have a physics engine, but it was removed in 2015. The reason for this was because ROBLOX wanted to focus on improving their building features instead.[60] However, they later explained that this removal was only temporary and they would bring back the physics again in the near future.[61]

The CEO and founder of Roblox is David Baszucki, who is also known as "Devdog". He made his first \$1 million by using a stock option from a company that he had worked at called Original Media. He was fired from the company for not coming up with any new products despite having achieved success in the existing ones. After this, he started to work on ROBLOX alongside his friend Owen Hill. Although Roblox was founded only in 2009, they had already made their first \$1 million by 2013.

Roblox is a very fun game platform for kids because they can create their own worlds and game scenarios with a lot of mini-games and activities such as playing sports and fighting monsters. Roblox also has many free platforms that have educational purposes which mostly focus on teaching kids about problem solving, teamwork, learning how to share with others and other social issues. The players' avatars can speak their created languages or standard English.

Roblox gives players the option to purchase membership for High School, Middle School and Elementary years. Players can upgrade their account to a VIP member which gives them time to play online when not connected to school wifi, and playing in moderation on weekends after school. Memberships cost between \$9.99 USD (\$10 Note: this price has increased since August 2018 but was not posted until September 2018) for elementary students, \$12.99 USD (\$13 Note: this price has increased since August 2018 but was not posted until September 2018) for middle school students and \$17.

ROBLOX announced the launch of an app called ROBLOX Studio in July 2009, which allows players to make 3D videogames using ROBLOX Soft, or Lua scripting. These games can be shared on the website and with friends via social networking and email, making the virtual world even more alive than ever before. The app is free, but users must pay for revenue sharing of their games. On January 30, 2014 ROBLOX released its first app exclusively for iOS devices called "ROBLOX Studio" which puts a lot of its features into a more user-friendly format that previously had to be accessed through two separate products.
