The art-style is that of a retro style 8-bit game and the stages in the PC version are represented by a 2D top-down perspective where the player controls their character using a keyboard, mouse or touch pad. The mobile versions are more casual and use intuitive finger gestures instead of keys to move through gameplay. The mobile versions have 3D artwork rather than 2D sprites while also allowing the player to interact with their environment and other characters as they play. Each coin character has its own unique abilities while all coins have different stats in speed, attack strength, maximum health points and jump ability. The player can also collect coins and turn them into gems and the player can use these to buy new items."

Great game by Coolmomo2 on 2013/04/25 18:50 This is an awesome word game! It is just like any other word game out there except for one thing. You can play multiple word games at a time. I like that because it doesn't make you feel like you have to stop playing just to start another game. It is my favorite word game right now. I love it!",
