If you don't want to take this serious then stop reading now, but if you want to see what I'm talking about, continue reading. You might feel a little confused about what I'm trying to say but I'll explain it further below.

On January 23rd 2018, ROBLOX announced that they would be closing down their Minecraft marketplace. The marketplace would close on February 28th 2018. In February 2018, ROBLOX began to create more games for mobile devices.[78]

One of the best things about Roblox is that it does not only have accessories which you can buy for your avatar, but it also gives players ways to earn free robux. There are many ways in which you can get free robux for your account and they are always changing. They also constantly update their website with new games and content so you will never get bored when using this site. You can play games that are similar to Minecraft and you can even create your own place. The best thing is that Roblox is free so you will not have to spend any money if you do not want to do so.

ROBLOX also allows people to manipulate the games in an unfair way; they can do this by changing the difficulty level of a game or removing potential players from playing a game. They also can sell cheat codes on their website. This is similar to the "scams" created by advertisers in that they are selling cheats for an unfairly high price (such as \$2.50 USD) so that only people who pay will be able to use the code to cheat or hack the game. However, this is an unfair way of making money.

ROBLOX released its first Android app on October 13, 2013. The app is currently available in English and has over 2 million downloads on Google Play. It was launched for iOS on December 17, 2014. The application allows players to create games and play previously published ones, but does not allow for publishing of user made items or models. On May 30, 2017 ROBLOX released a new version of its app called Ava (ROBLOX's Mobile Application). See above section for more details.
