The news has attracted mixed responses from users. Some believe it's an improvement since it's more reliable, and fixes most of the bugs that caused users to constantly lose their work. Others think that it is useless due to the fact that ROBLOX Studio randomly changes collision methods and there are no descriptions on how to remedy this problem. Some have even started questioning how Roblox handles the games they host as well as some of their policies towards adult players/contents, and other problems like spam bots.

Roblox is a very fun game platform for kids because they can create their own worlds and game scenarios with a lot of mini-games and activities such as playing sports and fighting monsters. Roblox also has many free platforms that have educational purposes which mostly focus on teaching kids about problem solving, teamwork, learning how to share with others and other social issues. The players' avatars can speak their created languages or standard English.

However, there is no way to directly transfer items or coins between accounts unless both parties are friends with each other on ROBLOX; however they can work around this by transferring the item to a shared place and trading the item from that point.

The developers of Roblox use the "Terms of Service" and "Privacy Policy" to monitor accounts for violations to these rules, also using the "Report Abuse" feature where other players can report any rule breaking or inappropriate content to moderators.

Roblox has been criticized for bombing players with harassing messages that appear on screen. In 2013, The Washington Post claimed that they were able to set up a fake email address in order to send players fake emails. On November 29, 2018, it was announced that they had removed the ability for players to send fake messages and that they were working on a new update that would do this.
