The script system can be used to create a semi-spamming robot. This can be achieved by constantly creating invisible scripts that automatically click other user's pages. This can be done by using a script that spreads to everyone else's page, and then moving the user to the top of the list. However, this technique can be easily prevented by simply moving the user to an undesirable position in the list.

It's possible to use Roblox as a peephole into other people's accounts - this can be done by using third-party software like PeepHole to install backdoor with root privileges for the account. Because it has such wide availability on each device, it is an easy way for hackers to compromise multiple devices in one go. It was reported that 2-3 billion public profiles were compromised in Brazil alone in June 2018 and April 2018!

There are lots of bugs in this game and we need a way to report them so they can be fixed or can be added into a sticky post.There is not enough room to write here, too much!So what I am going to do is go over the bugs and glitches that are in roblox,then I will tell you how we can get them fixed or changed.

On October 10, 2010, Roblox replaced their old homepage with a new one. It was also released as part of an update and it was later applied on January 26, 2012. The old design was later removed from the website. A redesign of the website would be released on February 23, 2014. With this new redesign, Roblox added a news feed to the site and went back to the old design before October 2010.

I don't really have an answer for you, but I'm sure this is a problem that other people have as well. I think the game needs to be made less serious because people will not want to spend money on fake money (robux) if they know there's no real value behind those items they purchased with their fake money. The best way to accomplish this would be to make hats, shirts, etcetera for gamers who spend more than a certain amount of money.
