Rated 5 out of 5 by Anonymous from The best game ever! ROBLOX is one of the greatest games I've ever played. It lets you make your own adventures with your friends or in single player mode! This game I'd give a 10/10 because you can build anything you want, and there are still many things to do. For example, if you're tired of building things, there are games to play on Roblox. You can be a police officer, a fire fighter, or even an architect! Roblox is a truly awesome game that needs to be experienced!

On August 31, 2017, there was a large lawsuit that ROBLOX was involved in. The user "Bella Thorne" had an unverified account that was deleted by ROBLOX due to copyright claims, although these claims were proven false. Then, the account was deleted and the user made a video about how her account got taken down, where she shows screen caps of some users who hate her on the website, as well as saying several bad words such as foul language and racial slurs.

In order to create a game on ROBLOX, one must first obtain a Builders Club membership (a free membership that is required). Upon purchasing this membership, players may then use the in-game tools provided by ROBLOX or the "Studio" to create games that are interactive like FPS, MMORPGs, and various other game types. The engine is not limited to 2D games like most flash games are; it can be utilized in the creation of 3D games too.

Roblox users sometimes experience glitches that can let them bypass the moderation system. For example, if a moderator sends you a message and you reply right after they ban you, it will say that your message could not be delivered because they are moderating (unless you previously muted or blocked the user).

ROBLOX is built upon a custom system that includes its own scripting language and core programming languages. While it may not be true to say that all games on ROBLOX are made with ROBLOX's scripting language, this is true of the vast majority of games on the site. The scripting language is easy to learn, but more advanced scripting calls can be difficult to implement for users who do not know the syntax or do not have the time. This has led to many third-party solutions (modification of gameplay, ROBLOX engine modifications and others) being made by experienced users so that less experienced users can get a head start in the game development process.
