On July 10th, 2018 the game was removed from the ROBLOX website and replaced by a non-game item called "Anthem". It is unknown why it was removed. On November 15th, 2018, ROBLOX released a new work-in-progress game on Steam named "Anthem". It was revealed that the company decided to release this new version of the game after listening to many negative comments about its original version.[89] On November 23rd 2018, it was announced that the game would be released for free for everyone due to its many issues.

Roblox is an incredible game that gives people the opportunity to play in a virtual world that has so many different games, and it's also completely free. In roblox there are many different categories of games you can play, for example you can create your own game, and the possibilities are almost endless. The first thing I was really interested in when I started playing roblox was creating my own avatar which was really fun because you have a lot of options to choose from. You can pick from what hairstyle you want to wear or even what kind of clothes you want to wear. You can also pick how big or small you want your avatar to be, how they look in the mirror and of course what color the hair is. You can even choose if you want them to wear glasses or not.

If you look at the way the majority of games are played you realize that one person or a group of players will have a significant advantage over another unfairly and those who aren't as good will be forced to pay more for their virtual items in order to keep up with the better players. That's not fun.

Roblox offers a tremendous amount of games and features which, once you have played, can easily be overwhelming. If this is the case for you, keep it simple when creating your own roblox games. Choose a theme that is highly in demand right now or create something compatible with the standard ones. A simple game project can be as easy as tapping and holding three fingers on the screen to throw balls of fire at your opponents' faces. Do not worry if no one plays your game, since this will happen when the topic becomes old news among other players.

Implementing technology such as Oculus Rift and PlayStation VR would allow the company to create new VR games. Again, ROBLOX has been criticized due to its unusual (less than the minimum) end user license agreement. Roblox has released a new version of its app called Ava (ROBLOX's Mobile Application). See above section for more details.
