Roblox has been criticized for letting users access mature content, such as nudity, on the platform. In March 2018, it was reported that there were multiple nude characters on Roblox. The game had a character that was wearing only underwear. The character also had private parts that could be exposed to other players. This resulted in a large number of complaints being submitted to the company and they responded by making the character wear pants. However, the character then became fully covered and was unable to be exposed in this manner anymore.

ROBLOX uses cookies, a small piece of data containing a unique identification number that is sent to the user's browser from the web server and stored on the user's computer hard drive. By storing on the hard drive, ROBLOX is able to recall user preferences and settings, such as game scores or user names. ROBLOX uses cookies to monitor how users use the platform as well as how effective its ads are at converting users into paying customers.[3]

ROBLOX also offers a plugin system similar to most other websites that can give access to nearly all items on its website, except for things like accounts and global objects like chat rooms. Plugin developers can add their own items to ROBLOX through a GUI. However, this is only for private-use plugins and is not available to the public.
