Once you know the IP address, visit the Minecraft Server Hosting Provider's web page and find the info about how to connect to it. You can either give them your Minecraft username and password or you can access their information directly by typing in the IP address into their website. If you are using a Bukkit or Tekkit server, then all of this should be included in their instructions for connecting. With an individual server, you may need to read through these steps again if there are any slight differences between your own personal server and the one that you are trying to connect to.",

Minecraft Bedrock Edition is an online game that everyone can play on their smartphone or tablet. This version has been created especially for mobile devices like smartphones, tablets, laptops or Windows tablets. You will completely control your avatar and its movement, while enemies appear on the screen and interact with each other. The game has a new and improved graphics engine with increased performance in order to make it compatible with unlimited number of players.",

"Rust's central gameplay is available in both singleplayer and multiplayer modes. When playing on a server with other players, combat is enabled and players must fight or flee from other hostile players who are also scavenging for resources. If a player is killed by another player they will not be able to respawn until they have been to a specified area of the map which acts as the game's 'spawn point'.",

The game's graphics were heavily criticized in reviews. Many reviewers commented on the low-fi, blocky nature of the character models. Furthermore, many players expressed discontent with how easily they could break objects in-game.",
