On July 26, 2018, ROBLOX warned its users about several scams on Roblox that are being advertised on YouTube. They were shown to have included links to pirated, unlicensed games, which are at risk of having their ROBLOX accounts banned due to the unauthorized distribution of their intellectual property.

ROBLOX also has a wide variety of blueprints ranging from minigames to full games. ROBLOX's game engine runs within their own website, which they call the "Roblox Platform". The platform also has its own virtual servers that are separated between each user (known as Virtual Worlds). ROBLOX licenses the servers from Sabre Corporation. This means that the servers benefit ROBLOX and not any individual person or company. A private server is solely controlled by an individual and can only be accessed through the client provided by them.[33][34]

Robux. Robux is the currency of roblox that can be purchased with real money, although there are also other ways to receive them within the system of roblox itself. The way they work is very simple - you can use Robux to purchase in-game items, such as clothes for your character or even full-on animations such as dances and others. This adds a form of virtual economy to the game which adds depth and meaning into it - although the impact of the impact that this has on the game can be debated heavily depending on who you talk to. This means that, while there is a sense of the possibility of winning content within the game - there is no chance of getting content without paying for it.

Rated 4 out of 5 by Anonymous from Fun and Great For Fun! I've been playing Roblox for almost 11 years now. It's a great game for kids, teens, and adults. If you didn't get this game then you're missing out! It's so much fun to build things with your friends and play thousands of games.

On December 4th 2018, ROBLOX added a new feature called "Workshops" to their website. The forums were flooded with many negative comments and claims that it was poor execution of a feature meant for building games. They were also accused of being lazy about implementing it into their website.
