Here's how my Minecraft Bedrock Edition looks on a mobile phone. The new update makes it really easy to play using a mobile phone. You can see all your friends that are online when you open the game as well as the worlds that are being played by your friends and many more features. This is really cool because it allows me to check what my other friends are doing while I'm playing on my own server with my friends."

The worst part is that, there are no anti-cheat systems in Minecraft, so you can just hack all day and night and the server owner will be fine with it. However, this is not recommended because of the consequences you might suffer from when you have a moderator or admin to kick or ban you out. If you want to obtain the same advantages of cheats, but don't want the risks associated with cheats, then try using mods instead. Unfortunately, pro players who get banned for cheating will use ban evading methods which will allow them to bypass bans or avoid detection from server administrators. Many servers have picked up on this and started filtering IPs for known cheats and ban evaders."
