How to Connect to a Minecraft Server – The way in which you connect to a Minecraft server depends on what kind of server you are using. If you are using a Bukkit or Tekkit server, then the connection will be handled automatically and everything connected through the same IP address. You can connect directly by typing the IP address into your internet browser or the host name of the server. If you are using an individual private server, you will need to know an IP address of where your Minecraft Server is located. The easiest way that anyone can get this information is by going to their router's configuration settings and finding out the IP address given from them. This IP address is different for each device and will be different every time that a person uses it."

The best benefits of a Minecraft server are the ability to play with friends no matter what location they are in and the ability to play Minecraft Multiplayer on your own or with any group of players in which you share control of your servers. If you want to enjoy the benefits of a Minecraft server, it is recommended that you go through hosting companies like M2Hosting.com or ProvectusHosting.com, both of which offer complete solutions from start to finish. You will also need to purchase Minecraft server plugins such as CraftBukkit and WorldGuard from the BukkitDev website."

How to Download and Install Minecraft Version 1.7.2 STEP 1 Download the Minecraft version 1.7.2 files here. STEP 2 Download the Minecraft version 1.7.2 worlds generator here (optional). STEP 3 Download a Winrar alternative called 7zip and use it to extract the downloaded file. STEP 4 Locate the download folder and copy over the contents of it into your Minecraft game folder located at

C:\Users\YOUR\_USERNAME\_HERE\AppData\Roaming\.minecraft\. STEP 5 Restart your computer. Your Minecraft version 1.7.2 world should now be ready to play! To confirm, in the game settings, you should see the 'New world' button that reads "1.7". If you don't see this button, then something has not gone right - make sure you install the Minecraft worlds generator before trying again! Enjoy!";

Mods that change the world are more complicated to install because they usually add a lot of new blocks and features to your game. This means that mods actually have to replace your old world with a new one. So if you want to uninstall them, this is not possible without losing your world.

This means you often have to back up your world before installing the mod so you can always go back if something goes wrong."
