In 2008, the company launched an official website for users to store their games on the website's database and manage their avatar. In 2009, they also launched a virtual currency system called "Robux". These features allowed them to attract a large amount of players to the website at an early stage.

The company's Terms of Service forbids developers from using Roblox's data for marketing purposes including allowing developers to sell their own products on the platform. It also prohibits them from using Roblox's data for behavioral advertising such as ad marketing based on the age groups or ethnicity of an individual user.
