On July 14th 2018, developers Facepunch Studios were forced to remove the games "furry" character models after the studio were sent a legal letter from the Australian High Court. Although this issue was later resolved in favor of Facepunch Studios, it highlighted the ongoing issues over intellectual property rights regarding cosmetic character items for online video games. The game has received mixed reviews. Rami Ismail, co-founder of indie game development blog Vlambeer, describes the gameplay of "Rust" as similar to a DayZ-style open world survival game, but says it is "a hundred times better in many ways". He stated that the biggest improvement is in how "Rust" handles players' mood. In DayZ and other games like it, he said that players are constantly forced to make decisions about how they want to spend their time: by killing zombies or by doing a little bit of both. In "Rust", players have a greater degree of control over their consumption of resources; Ismail said that the game's resource system allows players to scavenge for wood, metal and other supplies, allowing them to build items and take care of their daily needs without having to worry about starvation. This, he said, makes camping as a survival mechanic far less useful than it is in DayZ or "Minecraft".",

Minecraft hack is a very helpful feature. This is because it increases the amount of health,food and resources available in game, just like cheats do for other games while playing on multiplayer servers. The things you can get are infinite. Basically, this means the developer of the program has put all the items into a chest or an inventory, and if you extract something from it, this will auto-generate it. However, there is a slight problem that sometimes things will appear in your inventory when they were not added to it by the developer of Minecraft hack.",
