The site is very buggy due to the fact that user-created games are made in such a way that users can alter almost every aspect of any game. However, this has upsides too as users can fix most bugs themselves. They have often been taken down because they are "offensive". This is hard to believe since the site has been around for nearly 10 years. ROBLOX allows people to advertise on their site for just about any product they want and will let them earn money with it. However, this can be considered a bad thing in some cases, as advertisers can create "scams", such as charging people \$5 dollars to create a game that can only be played by Admins or other users with unusual settings/roles.

Some other popular tools for hacking Roblox are involved in using a console to execute commands on another user's account; also, there are commands like .rm in which the user can delete other accounts. One of the common ways that hackers can hack Roblox is by using a proxy service. A proxy server is an intermediary server that acts as an agent between two network entities. A hacker can use a proxy program in order to reach another user's information. When another user logs onto their account using this program, the main computer uses the proxy server first before it accesses Roblox. This hacking method is typically used by spammers to hack Roblox accounts and obtain personal information such as passwords and usernames that are used for cyberbullying. One of the more advanced techniques of hacking Roblox is through phishing. Phishing involves sending an email that is designed to look like it is coming from a trusted source. The email will ask for the users' login credentials or ask them to click on something else like a link or an attachment. If the user clicks on the link, they will be redirected to a fake website that looks like something they have visited before. Hackers can use this method to access other's accounts by using another person's credentials.

I love how you can play with your friends but I wish that it was easier to make friends, and I also think that there should be more options to choose from when it comes to picking a skin, and I also wish that there were more games with different kinds of genres like horror or even some kitty games for cute lovers.

They have also created a website called ROBLOX Studios which allows users to create and upload their own videos to YouTube in order to advertise their videos as well as doing tasks that can be made money such as editing videos, building websites, etc.[47]
