A serious game should be fun whether you spend money on it or not. The developer should not make a profit from people who don't care about winning but rather just want to play and have fun. If there is real value in the game then it can sustain itself through micro transactions that offer cosmetic enhancements only, by providing new texture patterns, color schemes, new props, etcetera.

If you want free robux fast, then you may just have to spend real money. This is obviously a very risky method that could get you banned from twoplustwo, but it can also work very well if done correctly and with attention to detail. I currently have a spreadsheet that has various amounts listed for different offers and payment methods. I am currently using Paypal as my main source of income, but I am considering switching to a more reliable service like Bitcoin or Amazon gift cards. I don't want people knowing that I am using this method as these will probably give me a bad reputation.
