Throughout 2008, ROBLOX released a handful of new products including: "Virus Assault", "Prophet", and "Super Bomb Survival". "Prophet", released in August 2008 was essentially a demo for "Super Bomb Survival" which was released in November of the same year. ROBLOX started to develop more games in 2009, including: "Boom Boom Speedway", "Pirate Invasion", and a brand new version of "Dance Off". On February 6, 2009, ROBLOX launched a new game named 'Gladiators'. This game was one of the first games where being shot by another player would cause damage towards your avatar. It also included characters that could attack back.

The game has a number of features that help users to create their own games. Users can mine for materials in the sandbox and use them in their own games, or they can buy materials from other users in the Marketplace. The menu includes a number of categories, such as Buildings, Boxes, Characters and Game Objects. Users can tick these categories and use the menu to search for whatever they need.

Rated 5 out of 5 by Anonymous from My favorite game I love roblox. It is fun and it can help with school work. It's a bit pricey but worth it. Rated 5 out of 5 by Anonymous from love this game i love this game! it's really good for my age group, except the fact that you have to pay 30\$ or so to get wings which aren't even that good to begin with! they don't even fly that great, plus they only last for about 3 minutes anyway... other than that it's a great game!

Because the codes were removed, many players are currently trying to figure out how to get free robux without getting scammed. Players who are too young to have an account and/or don't have a credit card can still get free robux by following these steps:

On November 2nd, 2018, ROBLOX announced that the company is looking into implementing state-of-the-art anti-cheat technology. This was made to reduce the chances of "boters" putting random objects in games that don't belong there or making designs that look like they can be through a video editor. The company also stated that if there are any issues with their anti-cheat software, they will let everyone know as soon as possible.[24]
