Always back up your world:Before installing a mod it is always a good idea to save your world before you do anything else. This way, if something does not work out and you need to uninstall the mod or require a clean save, you will not lose everything. This is very important and we cannot stress enough how important this step is for most players! Install it correctly:Installing mods is different for each of them because they all have different requirements and rules about what files they will change in Minecraft. For example, some mods will just replace certain files while others will replace a lot more. Make sure to read the mod's description and the developer's website and follow them accordingly. If you trust the mod's description or its developer in general then it is probably safe to install it. If you are unsure at all, it would be a good idea to examine each of your files before installing so that you can see if anything has been altered by this mod.",

If you are just looking for something lighthearted then it is recommended that you go with a smaller server where rules are less strict and there will always be someone online with whom you can play. You may also want to try out the Minecraft Marketplace for some great servers that let players learn about what makes Minecraft so special while still offering high-level gameplay and content.",

Mods often change features of your game without actually changing your world. For example, there are mods that simply make you invincible or allow you to fly for unlimited amounts of time. These kinds of mods work by changing the existing rules and code within Minecraft so that they can replace them with new ones. This way they can add new features or block-types to the game without actually having to change your world. These kinds of mods are usually easy to install because they often replace certain files in Minecraft rather than adding anything new to it. Keep in mind that often, when you want to remove a mod that is already installed, you need to uninstall it completely.",

The specific hacks used by rust players are often used by other games, and as such have been modified to suit the needs of rust. Using these cheats can result in a game ban on the account in question, but as the game is still in early access this is not guaranteed. Facepunch Studios bans players for using cheats on their servers, however this does not apply to singleplayer and on private servers which do not use the official Facepunch credentials.",
