What is a Minecraft Server List? – A Minecraft Server list is a list of servers that you can use to connect to. In order to use one, all you need to do is type in the IP address or host name and then choose one from the list that appears. If you are using a Bukkit or Tekkit server, then there will be some connection issues that need to be sorted out before connecting directly through the IP address or host name. For more information about this, please refer to our article on how to connect to your minecraft server here.",

Mods often change features of your game without actually changing your world. For example, there are mods that simply make you invincible or allow you to fly for unlimited amounts of time. These kinds of mods work by changing the existing rules and code within Minecraft so that they can replace them with new ones. This way they can add new features or block-types to the game without actually having to change your world. These kinds of mods are usually easy to install because they often replace certain files in Minecraft rather than adding anything new to it. Keep in mind that often, when you want to remove a mod that is already installed, you need to uninstall it completely.",

Once you've downloaded Minecraft version 1.8 and you're ready to start playing, start off by tapping on the "Start" button which we already mentioned in the installation step. That's all there is to it so just tap it to begin your game.",

In April 2021, it was revealed that "Rust" had already been banned by Valve Corporation from distribution on its Steam platform for violating the company's end user license agreement. The ban was later lifted under appeal but made clear that Valve intended to introduce further restrictions based upon future violations of its terms of service.",
