These are mods that change existing world features, block types, and height levels etc. These kind of mods can be used to change everything about you game from how it looks, to how you battle other entities. These mods often replace the existing files in your Minecraft so that they can provide new blocks and changes without having to actually change your world. Weapon Mods: These kinds of mods only add weapons into your game so that you can fight other players and mobs. You can use these weapons in different ways to improve your performance in the games. They usually do not alter any existing blocks or features when they are installed.",

Minecraft Servers are generally run on either a physical server or a virtual private server (VPS). A physical server hosted by the user and rented from third-party companies, ISPs, universities etc. or free services like NFOservers.com, Adverline.pl and VirtualRack.co.uk which are VPS's seems to be the most common way to host your Minecraft Server. A VPS or physical server is better for most, since it is more stable and customizable and can be set up to run on the same machine as the player's computer allowing for an instant jump in to a server when desired.",

Once you know the IP address, visit the Minecraft Server Hosting Provider's web page and find the info about how to connect to it. You can either give them your Minecraft username and password or you can access their information directly by typing in the IP address into their website. If you are using a Bukkit or Tekkit server, then all of this should be included in their instructions for connecting. With an individual server, you may need to read through these steps again if there are any slight differences between your own personal server and the one that you are trying to connect to.",

When creating a custom modpack, there are many different things you can do to give your server an extra edge over other servers or creative mode servers. These mods can all be obtained with a simple download, and even if you don't want to create your own modpack for your server, they are all still available. Players can also use these mods on servers that aren't part of the official Minecraft community if you decide to share and give them access to them.",

When creating a custom modpack for your server, it is generally okay to include builds from other popular servers or bases upon which other mods can be added. This will help add variety to your server and make it more interesting. Players will love to explore new areas and find things that have been added by other players. You can make your server unique and attract lots of new players by using this method.",
