Anthem: On June 15th, 2018, ROBLOX announced a new game called "Anthem". It was a FPS which was heavily criticized for violating many of the company's policies. The game eventually received negative reviews from users who claimed it was simply an unfinished product. The company also ended up making an apology on their website.

ROBLOX provides a feature that allows the user to build on their own server using ROBLOX Studio and upload it to their own server. This feature enables them to remove things that they don't like or people who break the rules and get banned from their creations. They can also control who enters their games. This also allows them to advertise their channels by making a game with a name similar to other popular games. However, this feature has many rules that the users must follow to keep their servers running smoothly. For example, they cannot advertise any kind of website or give out personal information about themselves.

Not all games are created equal and often we see them develop at an incredibly fast pace which makes us believe that this process will be smooth and easy but it doesn't always happen that way: first of all, people often have unrealistic expectations for themselves and secondly they forget to look at what others are doing and how the market reacts to new games.

In January 2013, the Chinese government started an investigation into various MMORPGs to determine whether the genre was suitable for children.[58] The same year, Sigaty discussed the possibility of a Battle.net-like service for World of Warcraft.[59]

The Roblox website has undergone several changes in terms of design. All the current releases before October 10, 2010 had a different logo from the one that is currently used. The beta site is also a different color than the current homepage design. If you visit the old Roblox website [1] it will redirect you to the new Roblox website, although on rare occasions it will instead take you to an error page.
