I know I made this review long but please read every word because I put a lot of effort into making this review good and hopefully it can help someone. Thank you for reading and keep in mind that this is not my full opinion on Roblox it is just a suggestion to help improve the game for everyone who plays.

On July 3rd, 2018, ROBLOX announced that they were no longer allowing people to make custom models for their games. Instead, they would be allowing users to build blocky models that could not be edited at all. They stated that this would prevent the creation of custom models and save money by preventing expensive data transfers.[22] The change was made in order to clean up the game because custom models complicates the "Roblox experience" in some cases.

On September 4, 2018 (3:00 PM), ROBLOX released a new game called "Roblox Shops". This game is similar to Roblox High School and Friends, only that it's a shop simulator. The gameplay involves shopping and using items in order to get more money as you play the game. The game was started by the company's developer and the first player of the game was the CEO.

ROBLOX has support for other game engines such as Unity 3D in its games (as seen in "Roblox Community Crash Arena Turbo Stars") and supports creation of games mainly through the use of its Studio application. ROBLOX also has their own scripting language known as Lua. The use of Lua allows users to create their own game modes.

On October 4th, 2018, Roblox introduced a new game mode called "Elevate", which had players build futuristic skyscrapers in the sky. Players were able to earn money by selling their custom skyscrapers for Robux. It was soon discovered that many of these buildings were copies from the game "Survival Island", prompting ROBLOX to ban users who had copied these buildings.[79]
