Some of the games on ROBLOX display ads on the top of their players' screen during gameplay. The player is able to skip these ads after 5 seconds, but if they do not and instead wait to see them out, then they will receive a small amount of ROBUX. In addition, members receive 30% extra revenue from games with ads placed above them.

ROBLOX has support for other game engines such as Unity 3D in its games (as seen in "Roblox Community Crash Arena Turbo Stars") and supports creation of games mainly through the use of its Studio application. ROBLOX also has their own scripting language known as Lua. The use of Lua allows users to create their own game modes.

Another disadvantage is that whenever a user updates their account, they are required to update the free robux script as well. Since it is hard for you to keep track of your own updates, you will need someone else to help you do this especially if you are constantly updating your posts several times a day.

On December 10, 2018, the "Free robux" cards system was removed by ROBLOX. Many players believe that this was done due to scamming of codes and due to players complaining about receiving cards they didn't want.

The CEO and founder of Roblox is David Baszucki, who is also known as "Devdog". He made his first \$1 million by using a stock option from a company that he had worked at called Original Media. He was fired from the company for not coming up with any new products despite having achieved success in the existing ones. After this, he started to work on ROBLOX alongside his friend Owen Hill. Although Roblox was founded only in 2009, they had already made their first \$1 million by 2013.
