On May 16th, 2018, ROBLOX announced that they were updating their "Terms of Service" section of the website to disallow using custom models or code to explicitly gain any sort of advantage in-game. They also block users from uploading custom model and code files.[20]

Once you have successfully installed Secret Scripts and RoboForm, then you can begin using the free robux script. Using the free robux script is very simple since its interface is easy to access for all users who wish to see how it works.

The inventory of each user cannot be accessed by anyone else. If you want to find out what a piece of furniture is for, you are going to have to purchase it from your inventory. There is no sharing of items between users; they can only be found in your own private stash.

ROBLOX has been accused of copying a lot of games such as FNaF World. Many of these games have similar gameplay and graphics to the point where it's hard to distinguish one game from another. ROBLOX has been criticized for not doing their own style very well, especially in regards to their graphics and unique ideas.

On April 27, 2018, ROBLOX released its own virtual reality headset on their website known as the "ROBLOX Visor." The headset is created in collaboration with Carl Zeiss AG. The headset has a retail cost of \$99 USD and comes with an HD screen capable of playing 2D and 3D content. The headset was also officially launched at E3 2018.
