ROBLOX Studio 2.0: On December 28th 2018, ROBLOX announced a new version of their Studio known as "Studio 2.0". The company claims that it is meant to be a new version of their previous releases which contains many improvements and better tools. It also allows users to earn cash if they choose to sell their items in the catalog.[91] On January 1st, 2019, ROBLOX updated the game and added a feature which allowed users to get an early access for Studio 2.0.

In May 2018, it was reported that the company had over 300 million daily active players worldwide. This includes the users who are in moderation, which is approximately 95% of all players. In addition, based on their own estimates, they stated that over 50% of these players play Roblox daily.

Weebly Pages later went on to become Pikazo. ROBLOX is the first game that has allowed players to have voice chat. [121] ROBLOX is the first online game that allowed players to invite others into their world and even allow them to build things like they used to in PC games. [122] The next games that would allow users to invite others into their worlds were Habbo Hotel where they had their FriendBook and later on also added a FriendChat system in December of 2011, Club Penguin where you could invite fellow penguins into your world, and Mario8 since 2014. [123]

ROBLOX has also been criticized on another level. Many people have said that they will never use ROBLOX again after the lack of response from the administration team. This is because even after reporting rule breakings, there is still no action taken against the players who do so. This has caused people to lose respect for the administration team.

In 2018, the company announced that they would be adding new measures in an attempt to stop children from getting weapons and access to violent themes. These measures include making it mandatory for anyone under the age of 13 to provide proof of identity when signing up for a Roblox account. The report also stated that the company has a team of moderators who work with different groups such as parents and educators to monitor games and stop users from being able to access offensive content.
