During the time when Roblox was first being developed (2004–2007), there were a small number of games created that were designed to troll or harass other user accounts on the game platform. Trolls could take advantage of the limited moderation tools and exploit loopholes in the "Terms of Service" and "Community Guidelines".

ROBLOX also offers badge packages; however there is no way of transferring badges between games. ROBLOX has other games such as "Roblox Heroes", "Roblox D&D", and "The Guild 2" (releasing on December 14, 2014).

ROBLOX also has a plugin called "Google Play", which allows any application made with Google Play's interface to be distributed on ROBLOX. The first release of this plugin was in April 2015, but there have been many updates since then.

Many games on Roblox are online multiplayer games. These games require an internet connection to play and players earn virtual currencies. These currencies may be used to purchase premium features or clothing, which can not be obtained in game. Players can purchase these premium features using real currency such as iTunes or Google Play credit. A key feature of this application is that it allows the users to earn free Robux through online ads and offers, and then use those free Robux for in-game currency in many popular games on Roblox such as Roleplay World or Math Trade Schools .
