On July 8, 2013 (3:00 PM), ROBLOX released a new website design. The old design was getting outdated and had many bugs that prevented users from accessing all of their content. This redesign changed everything to make it easier for everyone. Other improvements include simplified forum viewing/posting, improved chat system, improved site-searching/navigation, and improved ability to manage groups and groups permissions.

On December 18th, 2019, ROBLOX announced their controversial decision on how they plan on handling moderators in the future.[106] This caused controversy within the community as many moderators believed they wouldn't be able to perform their job correctly due to ROBLOX's change of plan.

ROBLOX has official clients for Windows, macOS, Linux, iOS, Android, Xbox One, and PlayStation 4. ROBLOX also has a game engine called "Build" which can be downloaded for free to those wishing to develop games for their website. Although not officially supported by ROBLOX themselves, the client source code is also available on GitHub. As such, there are unofficial ports of ROBLOX to other platforms not supported officially by ROBLOX such as Xbox 360, Raspberry Pi and Tizen. An early attempt at an iPhone port in 2010 was unsuccessful due to concerns over the stability of the platform and a lack of toolchain support.

Here is the link to MyRoblox. You can also find the very informative "Reddit Facts" page on the Roblox Help site as well, although it is no longer up-to-date. EDIT: This also applies to other games like Robokill, Minecraft and Terraria. Just remember where you find out important information. ;) Last edited by alyssa2789; 05-31-2019 at 05:44 AM .
