If you don't want to take this serious then stop reading now, but if you want to see what I'm talking about, continue reading. You might feel a little confused about what I'm trying to say but I'll explain it further below.

Rated 4 out of 5 by Anonymous from Very enjoyable I love this game very much. Whenever I play it, it makes me feel like I'm in a fantasy land. It has a lot of fun games to play like the space adventures, castle defense and many others. I would say that recommended this game to anyone who likes to play on the computer or laptop or anything else with computers. Overall it's pretty good.

Spamming: Roblox has been criticized for its extreme amount of spam. Some examples include the "Free Robux" scam, where people are tricked into giving their username and password to a third party so that they can steal their Robux, and the "You Have Been Tricked" scam, which consists of the offender saying something along the lines of "DON'T TRUST. HE IS TROLLING ME."

ROBLOX, from a mobile phone screenshot taken on 1 September 2013 Game Similarities and differences Grand Theft Auto Online This is another game similar with Roblox. It allows players to participate in various activities including robbing banks and carrying out heists, which is very similar to Roblox's Criminal series. [134] Cube World A game with many similarities with Roblox since it has blocky worlds that players can explore using their characters in which you can also build structures. [135] Elements This game is made to look a lot like Roblox. The main point of it is to destroy buildings to earn money and level up. [136] Bible Adventures This game looks just like Roblox, but with a few minor differences. [137]

One of the most popular ROBLOX games was "Hacker Escape", which was one of the most visited blogs on ROBLOX prior to 2011. It was a game where the hacker got into an abandoned house, and used numerous exploits to obtain admin privileges, allowing him/her to modify certain aspects of the game. This blog caused heavy controversy in 2011 because it allowed hackers to manipulate and change the settings on their games without consent from ROBLOX. However, after the release of version 1.0, this blog became outdated because developers started using hacks in their games that had not been discovered yet. In May 2012, ROBLOX launched a new blog system to replace the previous one, this paid-for feature was created by Epic Events Inc.
